Education

California State University, San Bernardino, USA **Aug 2022 - May 2024**

- *Master of Science in Computer Science (*GPA: 3.57)
- Relevant courses: Data Structure and Algorithms, Machine Learning, Artificial Intelligence, Computer Network

Gujarat Technological University, India (GPA:3.62) **Aug 2017 - May 2021**

- *Bachelor of Engineering in Computer Engineering*
- Relevant courses: Data Mining and Business Intelligence, Software Engineering, DBMS, Web Technologies, Operating Systems

Technical Skills

- Programming Lang/API: Python, PHP, JavaScript, SQL, C, C++, Shell Script, REST, gRPC
- Design and Databases: HTML/XML, CSS, React.js, Bootstrap, JSON, SQL, MongoDB, Hadoop, Spark
- Python Libs and Models: Keras, TensorFlow, NumPy, Pandas, Scikit-learn, Matplotlib, LLM Model, Neural Network
- Cloud Infra/platform service : Docker, Kubernetes, Amazon Web Services, Microsoft Azure
- Tools: GIT, Microsoft Teams, Microsoft SQL Server, SharePoint

Work Experience

Software Engineer at Infiniqe, India **June 2021 – Jul 2022**

- Designed "Property Management Website" using HTML, CSS, JavaScript, Bootstrap, and PHP resulting in an 80% UI responsiveness boost and 60% User engagement increase.
- Led AJAX implementation on the website, cutting page load time by 50% and boosting average pages viewed by 30%.
- Developed admin panel for real-time content updates, reducing update time by 60% and expediting new listings.
- Implemented robust SQL database connections, optimizing CRUD operations, improving data retrieval by 30%, and reducing server load by 20%.

Software Developer Intern at Infiniqe, India **Aug 2020 – May 2021**

- Contributed to scalable web app development, using diverse tech stack for 15% improvement in load times.
- Played a key role in collaborative project management, driving agile development cycles and enhancing project delivery efficiency by 25%.
- Participated in code reviews and debugging, leading to a 20% decrease in user-reported bugs.

Academic Projects

Stock Market Price Prediction | *Machine Learning and Natural Language Processing* **Jan 2023 – May 2023**

- Established LSTM networks for stock price prediction, achieving 82% accuracy, showcasing expertise in time-series analysis for financial forecasting.
- Utilized SVM, decision trees, and neural networks to forecast stock prices and volatility, enhancing prediction model performance for informed trading decisions.
- Developed ML model exceeding accuracy, offering actionable insights for short-term investment strategies.

Pet Bingo Game | Unity Game| Link **Aug 2022 – Dec 2022**

- Created an engaging Pet Bingo game in C# within Unity Studio, leading to a 40% rise in user engagement.
- Executed CI/CD pipelines, enhancing and reducing deployment times by 30%.
- Integration of the Scrum model boosted team collaboration and accelerated feature development by 25%.
- Applied thorough automated and manual test plans with Azure Test Plans, enhancing software quality by resolving 90% of critical bugs pre-production.

Sales Data Dashboard | Data Analysis using Power BI Tool |Link **June 2021 – July 2021**

- Launched a sales dashboard delivering vital data insights to client and senior management, driving a 20% surge in data-driven decision-making.
- Achieved data quality filter to remove noisy data, cleaning, clustering, and transformation protocols that improved overall data integrity by 35%.

Research Paper | *Architecture of AI* **Nov 2022 - Dec 2022**

- Researched various AI architecture frameworks like Google Tensor, Pixel Visual Core, Intel Crest, and Microsoft Catapultto assess their applicability and potential integration into organizational technology.
- Created comprehensive report on AI architecture advancements and recommendation for future AI framework development
